I strongly oppose NAB's petition 04-160. XM radio is a service I pay for and should be able to hear the weather & traffic on an as needed basis when I need it, not when it is convenient after 10 minutes of commercials. I already have to go to other sources to get my news due to the one sided views on all local channels with very little substance & complete omission of many stories. I am tired of seeing and hearing what the FCC wants me to. I like me options and you should have those in America. Please leave our XM radio alone. It really does no harm to any other programming.
